Overview

More than 10 years of experience in various industries. Few certifications. 1 publication.

Experience

Head of Platform, **TenTen** – Paris, Remote 2023 – 2025

Founding engineer at TenTen, a startup building a next-gen live walkie-talkie app.

- hyperscale from **5k** DAU to **5M+** DAU, accross 100+ countries
- architected and managed an AWS infrastructure from scratch to production
- built advanced internal platform services (database, gitops, iac, cdn, security, observability)
- low-latency WebRTC stack (sfu, turn, stun, sdp, dtls, http/3...)
- AWS | Istio | Kubernetes | ScyllaDB | ClickHouse | Prometheus | Golang | CF | IaC | ArgoCD

Senior Site Reliability Engineer, **BeReal** – Paris, Remote 2021 – 2023

Early engineer at BeReal, a social network where you post a photo of yourself every day.

- hyperscale from **30k** DAU to **40M** DAU in a year
- built the entire Google Cloud infrastructure from scratch to production
- complex engineering challenges (short window spikes, ha, low latency, high throughput)
- designed and built for cost, latency, performance, scalability, observability, security
- Kubernetes | PostgreSQL | Redis | NodeJS | Istio | Terraform | ArgoCD | Datadog | Cloudflare

Founder, **orchestrato.io** – Remote 2020 – 2021

SRE and DevOps consulting for startups

- Dougs +: Heroku to GCP, Kubernetes migration
- Pixwoo +: backend refactoring and GCP optimizations
- Superprod +: e2e Kubernetes deployment tooling on-premise

Platform Engineer, **Navya** – Lyon, Paris, Remote 2019 – 2020

Navya is a French autonomous vehicle startup, I was in charge of the platform.

- CI / CD OS build pipelines over GitLab, MaaS, Packer, cloud-init for vehicles
- coded a fleet management system with Go, Consul & AT protocol for vehicles
- automated API deployment and AWS infrastructure (terraform, ansible...)
- AWS | Terraform | Bare Metal | Embedded Systems | Golang | Ansible | CI/CD | Gitlab

Core Platform Engineer, **Vente Privee** – Lyon, Paris, Remote 2019 – 2019

The core platform team is transverse to the whole company and provide the infrastructure and tools to the other teams.

- designed a global block & object storage solution (Ceph, KVM)
- automation for QEMU, KVM internal needs
- on-premise Kubernetes clusters
- Kubernetes | Terraform | QEMU/KVM | Ansible | CI/CD | Git | Gitlab | Prometheus | Grafana

Lead Site Reliability Engineer, **Vente Privee** – Lyon 2017 – 2019

Leading the team dedicated to make the delivery of parcels fast and reliable (15 warehouses running 24/24).

- modernized the tech stack for warehouses WMS (Warehouse Management System)
- WCS (Warehouse Control System)
- idemptotent and reliable deployment of the WMS/WCS
- bringing new APIs to the users of the WMS/WCS
- built everything from scratch on-premise with Kubernetes
- challenged the status quo and rethought everything with a fresh eye
- Kubernetes | Ansible | PostgreSQL | MSSQL | MongoDB | CI/CD | Gitlab | Python | Node.js

Site Reliability Engineer, **Optimiz.me** – Lyon 2016 – 2017

Founding SRE, designed and scaled the GCP infrastructure, CI/CD, databases, monitoring and security.

- GCP | Kubernetes | Redis | Security | Ansible | CI/CD | Docker | PGSQL | Gitlab | Node.js

Platform Engineer (OpenStack), **CNRS** – Lyon 2015 – 2016

I was in charge of the OpenStack platform and the HPC cluster for CERN experiments.

- OpenStack | HPC | IaC | Distributed File Systems | Observability

Platform Engineer (OpenStack), **CNRS** – Lyon 2014 – 2015

I was in charge of the OpenStack platform for the eTRIKS project, a bioinformatics research project.

- built and operated a private cloud with OpenStack to support a bioinformatics
- led deep work on HPC performance optimization for OpenStack
- architectued and deployed a R computing (Rserve, R) farm on OpenStack
- open source stack (R, Rserve, tranSMART, PostgreSQL, Java)
- OpenStack | HPC | Ansible | Puppet | Performance | Distributed Systems | Observability

Datacenter Operations & Network Admin, **DCforDATA** – Lyon 2012 – 2014

Founding member of DCforDATA, a Tier III datacenter.
Acquired by Free (Iliad).

- facility management (power, cooling systems, high availability, security)
- built and operated our proper network transit infrastructure (Layer 2, Layer 3, Ripe, BGP, DNS)
- customer facing (sales, support, etc.)

System Admin, **Institut Lumiere** – Lyon 2009 – 2009

First edition of the Lumiere Festival (international movie festival)

Publication

eTRIKS platform: Conception and operation of a highly scalable cloud-based platform for translational research and applications development 2018

- https://doi.org/10.1016/j.compbiomed.2018.02.006 (Computers in Biology and Medicine)

Skill

Infrastructure: Kubernetes, AWS, GCP, Scaleway...
Data: PostgreSQL, ScyllaDB, ClickHouse, Redis...
Observability: Prometheus, Grafana, ELK, Datadog, Sentry...
Language: Python, Golang, TypeScript, bash...
Automation: OpenTofu, Terraform, Ansible, Pulumi, CDFTK, Puppet...
ML: llama.cpp, vLLM, CUDA, PyTorch, TensorFlow ...
More: >> +

Education

Certified Kubernetes Administrator, The Linux Foundation 2018

Google Cloud Platform Systems Operations Professionals Specialization, Coursera 2017

IEEEx - From Goddard to Apollo: The History of Rockets, edX 2016

Master's Degree Cycle d'ingéniérie, expert en systèmes d'information (ESI), Isitech, École d'Ingénierie Informatique – Lyon, France 2014

Associate's Degree (option administrateur système), Campus Sciences-U Lyon – Lyon, France 2008
